 WILEY-VCH

 ChemPubSoc
Europe

Dear Author,

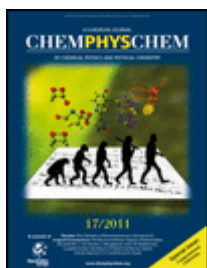

In the last years *ChemPhysChem* has grown to become one of the top physical chemistry journals worldwide.

Your contribution to *ChemPhysChem* has certainly contributed to that and therefore, we have set up **free access to the 25 most accessed articles in *ChemPhysChem* over the last 12 months** for you today.

You will see that the topics cover the whole spectrum of physical chemistry and chemical physics. This is a good indication that your contribution too will reach a large sector of the community.

If your contribution is not on the list, perhaps your next good manuscript will be!

Dr. Greta Heydenrych
Editor-in-Chief

25 most-accessed articles over the last 12 months from *ChemPhysChem*:

Quantum-Dot-Sensitized Solar Cells [Review] 
Sven Rühle, Menny Shalom, Arie Zaban

The Electrode/Ionic Liquid Interface: Electric Double Layer and Metal Electrodeposition [Minireview] 
Yu-Zhuan Su, Yong-Chun Fu, Yi-Min Wei, Jia-Wei Yan, Bing-Wei Mao

Characterization of the Excited States of Indigo Derivatives in their Reduced Forms [Article] 
Raquel Rondão, J. Sérgio Seixas de Melo, Gundula Voss

Self-Assembling Nanoparticles at Surfaces and Interfaces [Review] 
Sachin Kinge, Mercedes Crego-Calama, David N. Reinhoudt

ZnO: Material, Physics and Applications [Review] 
C. Klingshirn

Biomolecule-Functionalized Carbon Nanotubes: Applications in Nanobioelectronics [Review] 
Eugenii Katz, Itamar Willner

A Tunable Metal–Organic Resistance Thermometer [Communication] 
Andrew P. Stephenson, Adam P. Micolich, Kwan H. Lee, Paul Meredith, Ben J. Powell

Ionic Liquids: Solvents for the Electrodeposition of Metals and Semiconductors [Review] 
Frank Endres
